Subject Activity Report

Week Ending 6/2/85

1. No accidents. Held meeting with Safety Committee.
2. M.V. Green Spanker departed Kaiser Terminal after 20 days unloading.
3. Customer complaints involving poor strength performance on Type II with fly ash admixtures. Also one complaint involving slow loading times. Another complaint, found to be valid, that Type II sacks were intermixed with a pallet of Type III sacks. Mr. Dash is attempting to settle this one.
4. Ideal agreed to purchase 2000 tons of plant coal at \$42.35/ton, F.O.B. our plant. Haul was interrupted several times due to problems getting coal to flow through their system.
5. Finished clinker transfer from Durkee. 3500 tons of cement and 3500 tons of clinker on hand. Shipments are approximately 150 tons/week.
6. Mutual Materials Company complaining about our pallet return policy. Their representative will meet with Stan Webb to discuss the situation.
7. Shipped one truckload of bricks to Inkom.
8. Type I cement from Genstar exceeds 400 B.S.S. fineness and cannot be certified for state jobs. All other applications should be acceptable.
9. Paul Wishman may have hired an attorney to represent him on a disability claim against us. No confirmation of this as yet. We received from Lone Star Industries, records of his previous back injuries. Mr. Cunningham will present these to the state so LSI can share in the rehabilitation expense.
10. Visitors: None.
